PROJECTS

A-Spot_IT — *Spotify Wrapped Application*

- Developed a Spotify Wrapped app using Android Studio and Spotify API, offering personalized music data through an intuitive interface.
- Designed and implemented user authentication, personalized music data display, friend management, and customizable settings features.
- Utilized Figma for UI/UX design and Scrum framework for project management, ensuring efficient collaboration and code organization.

CollegeIt — *College Scheduler and To-Do List App*

- Developed an app using Java, Kotlin, and Gradle in Android Studio with SQLiteDB for data storage, enabling users to manage schedules and tasks efficiently.
- Led the design and layout, creating a visually appealing, intuitive user interface that enhanced the overall user experience.
- Collaborated with the development team on features like the daily view, ensuring seamless integration between design and functionality.
